Consumer Price Index, Philadelphia-Camden-Wilmington – April 2019 Area prices up 1.3 percent since February; 1.9 percent over the year

The Consumer Price Index for All Urban Consumers (CPI-U) for Philadelphia-Camden-Wilmington increased 1.3 percent from February to April, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Sheila Watkins noted that the recent two-month rise reflected an 8.1-percent increase in the energy index and a 0.7-percent rise in the all items less food and energy index. The food index also increased since February, up 0.5 percent. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

Over the last 12 months, the CPI-U increased 1.9 percent. (See [chart 1](#) and [table A](#).) The over-the-year rise was led by an increase in the all items less food and energy index (1.9 percent). The energy index and food index also advanced since April 2018, up 2.0 and 1.6 percent, respectively. (See [table 1](#).)

Chart 1. Over-the-year percent change in CPI-U, Philadelphia-Camden-Wilmington, PA-NJ-DE-MD, April 2016–April 2019

Source: U.S. Bureau of Labor Statistics.

Food

The food index rose 0.5 percent over the last two months. Prices for both food at home and food away from home increased since February, up 0.5 and 0.4 percent, respectively.

Over the year, the food index increased 1.6 percent. Prices for food away from home rose 2.5 percent, and those for food at home were up 0.9 percent.

Energy

The energy index, which includes prices for household and transportation fuels, increased 8.1 percent since February. The 2-month advance was led by a 16.8-percent jump in gasoline prices. Prices were also higher for utility (piped) gas service (5.1 percent) and electricity (0.1 percent).

Over the year, the energy index rose 2.0 percent, due mostly to higher utility (piped) gas service prices, up 12.1 percent. Prices were also higher for electricity (2.0 percent), while they decreased for gasoline (-0.4 percent) since April 2018.

All items less food and energy

The index for all items less food and energy increased 0.7 percent from February to April. Prices were higher for shelter (0.6 percent), apparel (4.6 percent), and recreation (2.4 percent), among others.

Since April 2018, the index for all items less food and energy increased 1.9 percent. Prices were higher for a number of items including shelter (2.7 percent), medical care (4.3 percent), and new and used motor vehicles (3.0 percent), while prices were lower for apparel, down 6.6 percent.

| December..... | -0.6 | -0.2 | -0.1 | 1.7 | -0.1 | 0.8 | -0.7 | 1.0 | | |

The Consumer Price Index for June 2019 is scheduled to be released Thursday, July 11, 2019 at 8:30 am (ET).

Technical Note

The Consumer Price Index for Philadelphia-Camden-Wilmington is published bi-monthly. The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 93 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 29 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 75 urban areas across the country from about 5,000 housing units and approximately 22,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at www.bls.gov/opub/hom/pdf/homech17.pdf.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **Note: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The **Philadelphia-Camden-Wilmington, PA-NJ-DE-MD, Core Based Statistical Area** includes Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties in Pennsylvania; Burlington, Camden, Gloucester, and Salem Counties in New Jersey; New Castle County in Delaware; and Cecil County in Maryland.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
